---

Okay, I was hoping WA DOE may have communicated needs on the topic. I was going to go to the blue ribbon panel summaries as well as West coast hypoxia panel.

Thanks.

Cheryl

**Subject:** RE: States Needs on the topic of Nutrient Enhanced Coastal Acidification

I do not have a letter to EPA after those, but WA has their Puget Sound Nutrients forum with related materials, and the blue ribbon panel summaries- Linda Anderson Carnahan and David Allnutt would know more about that info sharing/reports. There is also the letter of support from OR NEP for our Tillamook work - that was included as part of our proposal for the RARE program project. Let me know if you need me to follow up?

**Subject:** States Needs on the topic of Nutrient Enhanced Coastal Acidification

Hi Rochelle and Jill,

I'm preparing the research planning meeting next week in Cincinnati. Hoping that Nutrient enhanced coastal acidification will be included in the next research direction.

One thing that we think would be useful to have handy is draft problem statement and list of states needs on the topics.

Have you had interactions with State folks of their needs on the topic of coastal acidification?

I have the director of WA DOE's letter to EPA HQ requesting EPA begin assessment of WQC relevant to acidification (dated Dec 2012) as well as EPA letter to CBD (from 2016)

Stating what EPA is doing on the topic of OA.

Do you know of other letters requesting assistance on the topic?

Thanks,

Cheryl
